Polyguard & Poly-Wall, a Subsidiary of Polyguard Architectural Solutions for Total Building Envelope Protection against moisture and other contaminants

Serving Below-Grade and Above-Grade needs since 1950

POLYGUARD

- Underseal™ Systems
- Under slab, blindside, split slab and protected wall membranes
- Sheet waterproofing solutions
- Most robust and competitive membrane in the marketplace
- Premier manufacturer of drainage boards in the United States
- Offering most expansive line of waterproofing products in the country
- Polyguard's facilities are ISO-9001 Certified, providing more efficient manufacturing processes
- Over 2 Million gallons of asphaltic storage
- Our membranes protect against RADON, METHANE GAS, PESTICIDES, TOXIC MOLD, TERMITES
- Currently being utilized in Brownfield development
- Works as a total system with Poly-Wall's full line of air and vapor barriers, to protect your entire building envelope

POLY-WALL

- Patented, one-part thermoplastic technologies
- Air barrier and waterproofing systems

HIGHLIGHTS of AIR BARRIER SYSTEMS:

- Sprays at 40 wet mils for total coverage, and meets all ASTM tests
- Can apply to -20 degrees below zero, with applications up to the minute precipitation falls
- Apply to Green Concrete
- UV Resistance up to 1 year
- Adhesion to concrete exceeds 175 lbs/sq. inch
- Two men can apply up to 10,000 square foot of material per day
- No primer for touch-ups
- No tenting
- Material does not have to be heated in low temperatures
- Next day backfilling
- Cure time is less than 48 hours
- 5-20 Year Warranty
- ABAA Approved
